Harnett County Checkbook Online

One of the first actions that the new County Board of Commissioners implemented was to make the County finances more transparent. In a motion led by Chairman Burgin the County checkbook is now online and can be found at http://treefree.harnett.org/Weblink8/\ or www.harnett.org It shows all transaction and checks released by the county to vendors. In one section the general public can view contracts that are open with the county.

This move to place the information online is part of the transparent Government that many people wanted. The new board feels that this is the best way to accomplish this; the info is out there for anyone to see. The list has several names of vendors and people receiving money from the county. With this being implemented the public has the privilege of contacting their Commissioner and asking about different expenses. To contact your commissioner about this here is a list of public listed numbers from harnett.org.
