Where's Ellmers

Editorial

Joe Miller

County Commissioner District 5

Former congressman Bob Etheridge and I didn't see eye to eye on several issues concerning this country but one thing I will have to stand up for him on is he never forgot where he came from and he never forgot the people of this county. I would like to know where Mrs.Elmers is, we could use her right now but she is no where to be found. Mrs. Elmers sometimes will send someone from her office but that is always the same thing, I will have to ask Mrs. Elmers or I will have to take that up with Mrs. Elmers. In other words, nothing, we need schools, we need the government to give Harnett County what they promised when Brac started and to this point nothing. Big Fat Nothing! I have not heard a word of anything Mrs. Elmers has said or done on this issue. Maybe as a county we need to look at where the candidates come from and if they have any roots in our district which would help them remember who put them in office. I am yet to hear from anyone in any office that is willing to stand up for Harnett County and our issues with schools. We are waiting and listening and hoping for some answers from our state and federal officials! We had a 1/4 cent sales tax increase on the ballot last election which would have paid for the new Highland Middle School but just a few of us pushed for that and we see what happened to that. Ground has been broken for that school and yet the funding issue is still there.. Go Figure!!
